

### **#1. Find concepts in scenario**

The assistant began showing the scenario to Magna and asked to create a corpus in <http://corpus-retrieval.herokuapp.com/> using the keyword **Digital Library**

### **#2. The ten first projects from the corpus created**

1. <https://github.com/kitodo/kitodo-production>
2. <https://github.com/carltonnorthern/nickname-and-diminutive-names-lookup>
3. <https://github.com/codeguy/modern-php>
4. <https://github.com/cute-jumper/gscholar-bibtex>
5. <https://github.com/vphill/pyoaiharvester>
6. <https://github.com/PerseusDL/canonical-greekLit>
7. <https://github.com/snkim/AutomaticKeyphraseExtraction>
8. <https://github.com/inspirehep/inspire-next>
9. <https://github.com/machawk1/warcreate>
10. [https://github.com/PerseusDL/treebank\\_data](https://github.com/PerseusDL/treebank_data)
